

## Hidden Valentine Craft Activity

This activity demonstrates how to create a Valentine with a hidden message using a recycled envelope and scrapbook paper

### Materials

- Decorative paper (scrapbook square)
- Envelope (any size)
- Craft glue
- Decorative materials like markers, crayons, glitter
- Open work space

### Steps to make your Valentine

1. Cut a large heart from scrapbook paper, make your heart as wide as the widest portion of your envelope.

2. Glue the back of your envelope to the center of the heart.

3. Decorate the front of your envelope (we opted to recycle an envelope so we needed to cover up our name. Also don't put wet glue near the adhesive strip).

4. Open the flap on your envelope and use your creativity to make your own unique message for your special Valentine.
